Dr. Robert C. Hockett  
The Council for Tobacco Research  
633 Third Avenue  
New York, New York 10017

Dear Dr. Hockett:

I appreciate the comments included in your letter to me concerning the abstract on Smoking Habits and Atherosclerotic Lesions. Your comment concerning future experiments was particularly apropos to our situation since we have been carrying on pilot studies for using primates to study the effect of smoking on atherosclerosis. We are now at the stage where we need additional grant support for animals, cages, and some personnel for more expanded studies. I would like to make application to The Council for Tobacco Research to support some of this work and would appreciate it if you would send me the necessary application forms.

Many thanks for your support in the past.

Sincerely,

  
Jack P. Strong, M.D.  
Professor and Head
